

# trackframe day

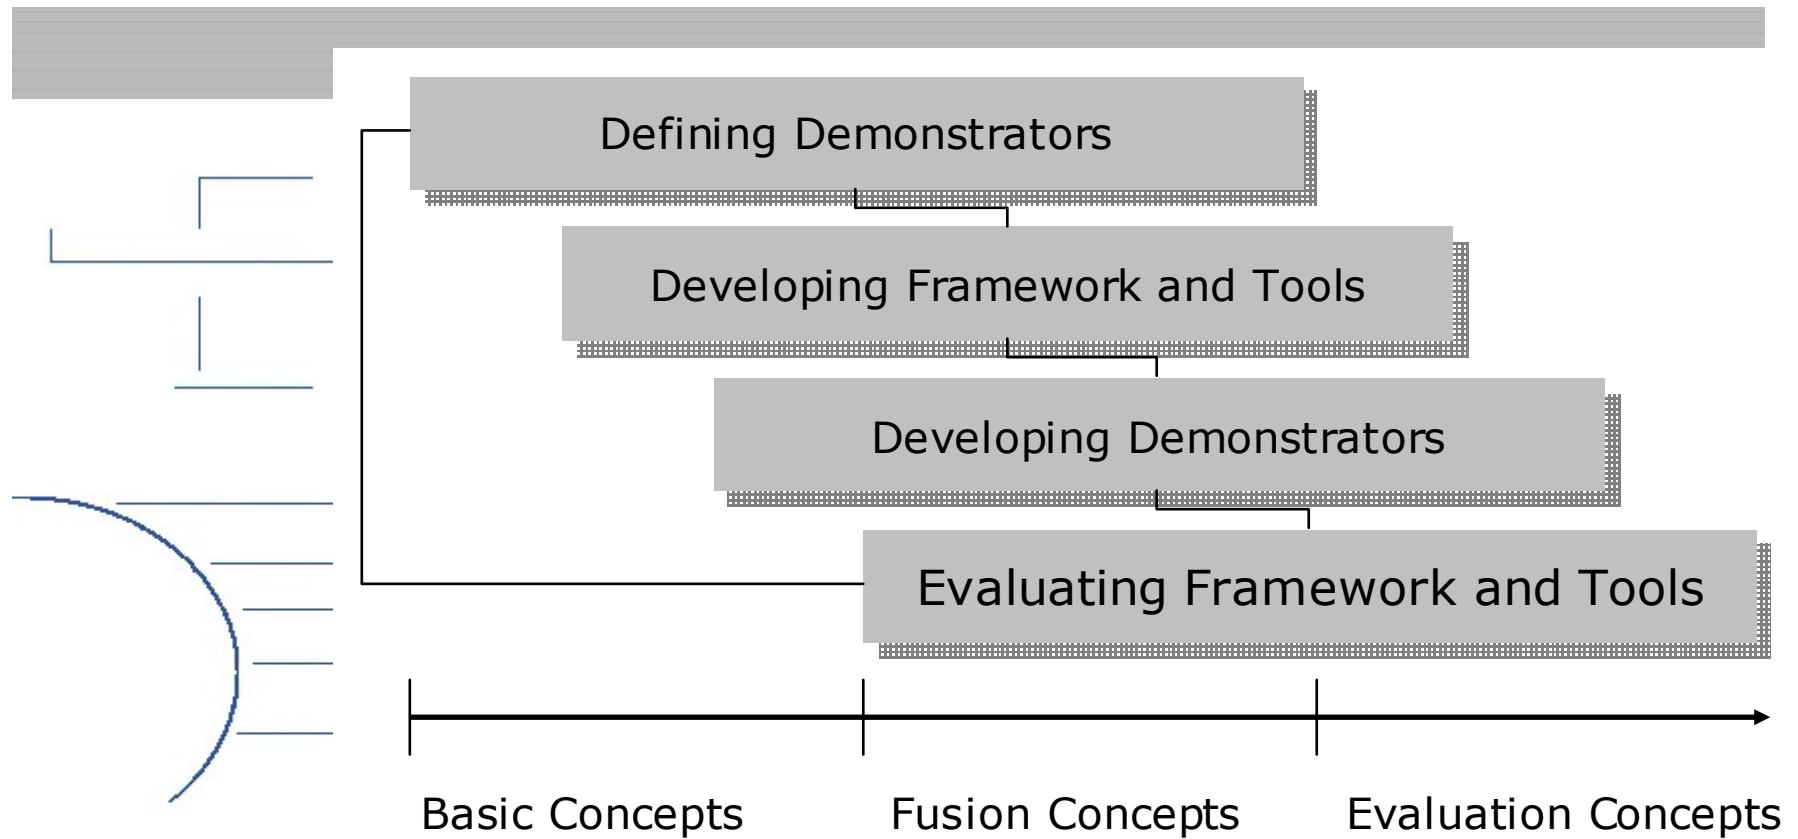

**- Heterogeneous Tracking  
for Augmented Reality  
in Wide-Area Environments**

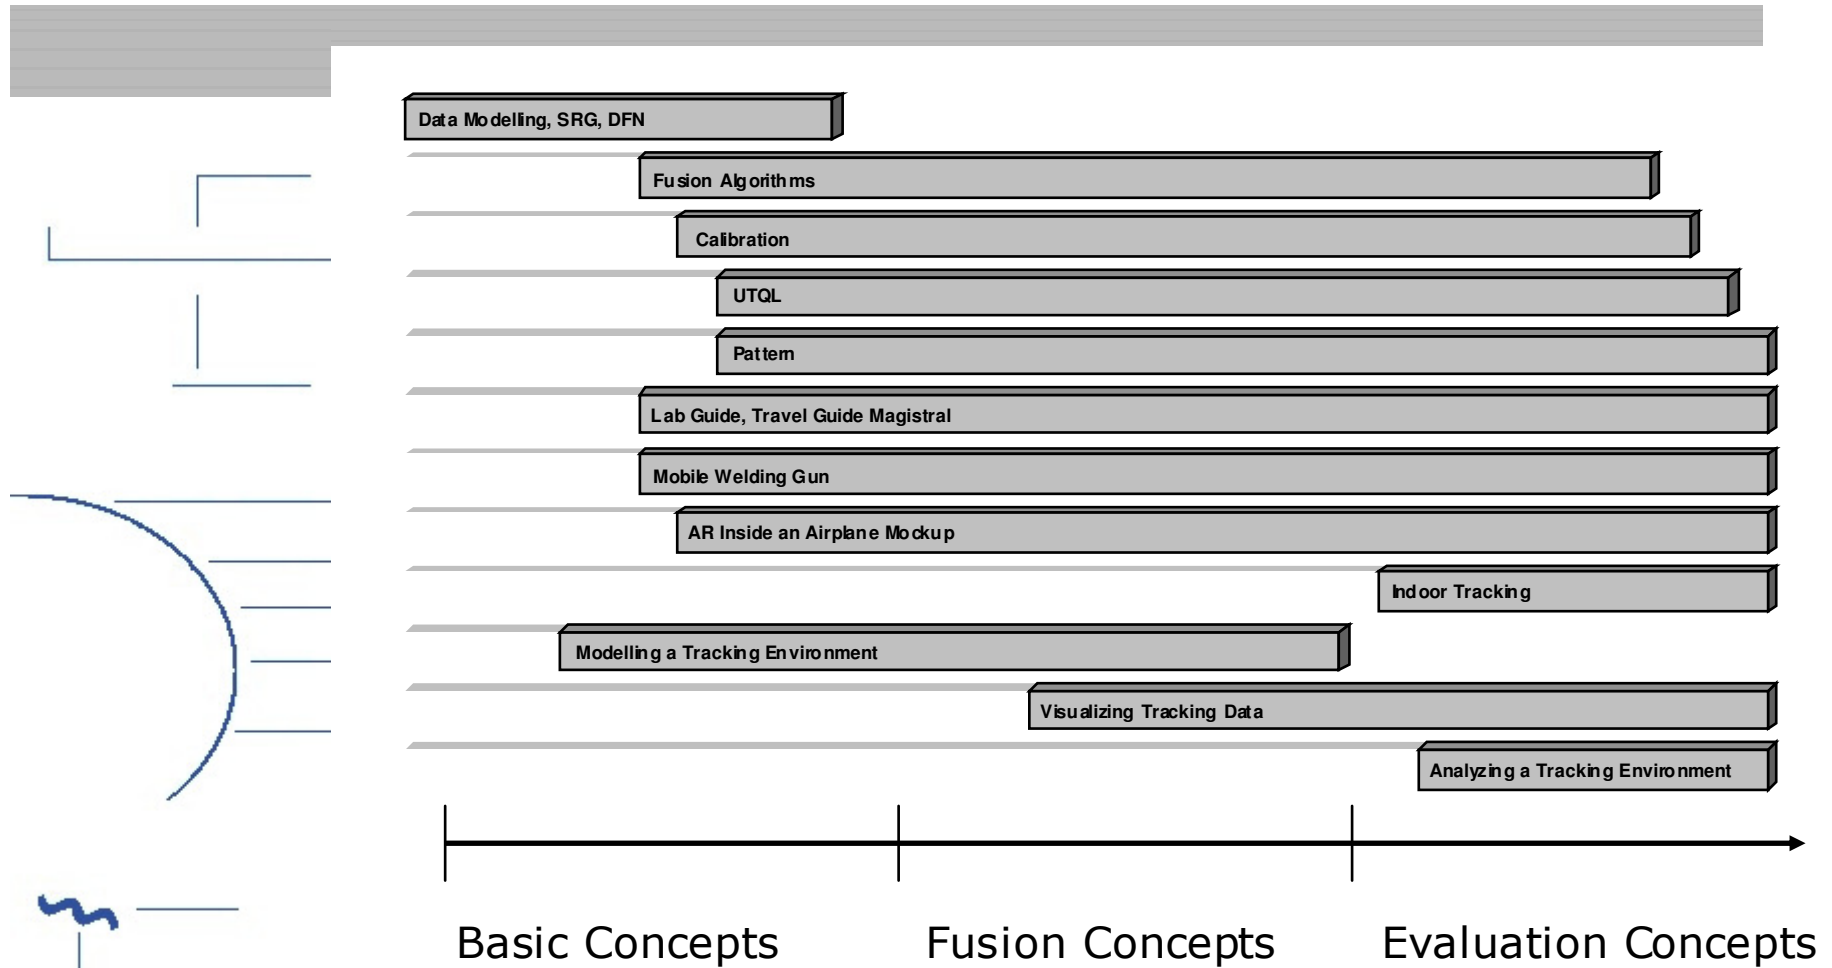

**Summary and Outlook**

**10.2.2009**

- Flexible adoption of tracking technologies in wide-area environments with varying requirements

- UbiTrack, trackman are available for download
- Production rollout of the enhanced welding gun intended (BMW)
- Further development of the "odometer" (BMW)
- Using UbiTrack, trackman technology as part of the enhanced design process ("virtual product") (EADS)
- Product development trackman intended (peyclon)
- Further development of the trackman concepts as part of other research projects (AVILUS)

Thank you
